County Comparisons

In comparing differences and similarities between Kenosha, Walworth., Bureau, and Winnebago county, the differences are many while the similarities are few. The main differences between the counties from Wisconsin and Illinois are population sizes (Winnebago is much larger than Bureau), non farm establishments (Bureau is more agricultural based economy than the other three by the private non farm establishments), Manufacturing shipments (by far more frequent in Winnebago than Kenosha and Walworth and especially more than Bureau county).

Similarities between the four counties include: number of white persons is dominant in population, high school graduation rates for 25 years and older are high, and people living below the poverty level is low. In comparing the four counties the differences by far out number the similarities between the counties.
